

## Electronic Security Systems Engineer

### Job Description Overview:

Nexus Security Solutions Limited wish to employ a security systems engineer with experience in installing and maintaining access control, CCTV, and intruder alarm systems. This position is available due to the company's recent success and ambitious growth plans. It provides a great opportunity for career progression within an extremely ambitious systems integrator. The applicant will require a minimum of 3 years' experience installing and maintaining electronic systems. Full training, support, mentoring and development will be provided to ensure that the successful candidate meets their true and full potential.

This is an opportunity to join a dynamic and fast-growing company. We are looking for someone who is reliable, skilled, takes pride in their work and enjoys working as part of a close team and is the perfect opportunity for somebody who wants to take the next step in their career.

### Location:

This is a field-based role however it is essential that candidates live within 45 minutes of our main office situated in Amersham, Buckinghamshire.

### Main Responsibilities:

- Installation and configuration of Access Control, CCTV, and intruder alarms in commercial settings to meet quality standards.
- Completion of commissioning documentation.
- Reporting to the engineering manager as required.
- Providing support to fellow engineers and trainees.
- Fault diagnosis, maintenance, and repair of security systems.
- Undertake regular training courses to further develop your skillset.
